JORDAN CAROLEO

80 Henearly Drive, Miller Place, NY 11764
(631) 521-5503 | jordan.caroleo91@gmail.com

FULL STACK DEVELOPER

Innovative and detail-oriented professional with 3+ years of information technology and full stack development experience. Develops front- and back-end functionalities for both web and mobile applications while leveraging extensive sales experience to integrate specialized client needs for high-quality project delivery. Collaborates with development teams to create user-friendly interfaces and efficient coding to ensure seamless operation, while assuming full-scope responsibility for ground-up creation of individual project aspects. Offers coveted set of programming, software, and project management acumen as well as the diverse financial background necessary to thrive in a dynamic, intersectional position within finance and technology.

CORE SKILLS & COMPETENCIES

- Full Stack Development
- Software Development
- Risk Management
- Software Engineering
- Team Leadership & Development
- Client Relationship Management
- Project Management
- Web & Application Design
- Financial Acumen

PROFESSIONAL EXPERIENCE

Junior Software Developer | Financial Industry Regulatory Authority (FINRA)   **Apr. 2021 – Present**

Key Responsibilities:

- **Security Interface Development:** Utilizes REACT to create user interface for security software, implementing dashboard system to consolidate all application information into singular hub for user and back-end ease of access.

- **System Updates & Maintenance:** Tracks daily ticket issues and leverages Java and Spring to develop resolutions, while monitoring and updating application firewall and conducting penetration testing to maintain system security.

- **Cross-Functional Collaboration:** Assists in directing daily meetings to track overall progress, assigning daily tickets and system tests to ensure streamlined workflows and overall project timeline compliance.

Coding & Career Coach | Career Karma   **Jan. 2021 – Present**

Key Responsibilities:

- **Coding Workshops:** Directs 5+ person workshops offering introduction to Java, Python, and other programming languages, while preparing tailored curriculums for all proficiency levels and performing one-on-one mentorship for optimal skill development.

- **Technology & Career Development:** Conducts interview preparation seminars while coaching students through standard employment coding challenges, while providing direction for student technical projects to develop individual portfolios and facilitate access to wider range of career opportunities.

Software Engineer | Mind School   **Oct. 2020 – Present**

Selected Accomplishments:

- **Developed viable application prototype within 3-month period**, preparing product demonstration and **securing $50K production grant** from New York University.

Key Responsibilities:

- **Mobile App Development:** Collaborates with development team to build mobile application facilitating behavioral development for children with disabilities. Utilizes REACT, JavaScript, Python and Spring to develop front- and back-end functionality, while creating specialized API endpoints and deploying project database utilizing AWS.

PROFESSIONAL EXPERIENCE (CONTINUED)

- **Development Code Management:** Manages development code utilizing Gitlab while facilitating continuous integration and deployment for each project aspect at production level.
- **Project Management:** Collaborates with team of 5 developers to create product roadmap and establish benchmarks, outlining timeline for production on individual functionalities.

ADDITIONAL NOTEWORTHY EXPERIENCE

Technology Mentor & Advisory Board Member | Kids Clubhouse   **Jan. 2019 – Present**

Client Service Specialist | Coldwell Banker Residential Brokerage   **Dec. 2016 – Dec. 2020**

Owner & Operator | JCLI Real Estate Inc.   **Dec. 2015 – Dec. 2020**

U.S Equities Trader | CyGroup Trading   **Dec. 2014 – Jan. 2018**

Directed individual portfolio of trades within licenced hedge fund, while collaborating with management to maintain firm portfolio allocations within acceptable risk parameters and capitalize on price movement and volatility.

EDUCATION

Bachelor of Science, Information Technology | Excelsior College   **2020**

Key Projects Completed:

Stock Tracking App
Developed live web-based application to track investments and monitor stock prices, while providing users with new investment opportunities as well as news feeds containing relevant financial information.

- Utilized JavaScript and Python to create simulated account to track user investments, while employing Flask to develop back-end site functionality as well as Bootstrap for styling considerations.
- Completed extensive unit testing while monitoring API functionality connecting app to market data and ensuring streamlined information flow for real-time updates.
- Presented working prototype for class and professor review while outlining application goals, project benchmarks, and final product capabilities. Continues to monitor site and perform necessary maintenance and updates.

EasyTrade App Development
Created Robinhood clone utilizing React.js for responsive and interactive front-end interface, while navigating Finhub REST API to propagate real-time stock prices and portfolio values.

Certificate, Software Engineering | Springboard   **2020**

Bachelor of Science, Economics | State University of New York at Stony Brook   **2013**

TECHNICAL ACUMEN

Programming	HTML | CSS | Java | Javascript | Python | Dart | SQL
Frameworks	Flutter | jQuery | Bootstrap | React.js | Redux.js | Node.js | Flask | Express.js | Firebase | PostgreSQL | SQLAlchemy | AWS | MongoDB
Project Management	JIRA | Gitlab | Github | Bitbucket
